## Good Day's Sport At The Redcliff Annual Stampede

Crop Conditions & Many Other Attractions were Main Cause of Much Smaller Attendance

Several other attractions and the very unfavorable crop prospects in the district were largely the cause of the poor attendance at the Stampede here on Dominion Day. Despite the poor attendance, however, the day's program which was longer, more varied and more interesting than usual, was carried out most successfully and furnished a splendid day's celebration.

Disappointing and discouraging as was the poor attendance, it may be surprising to many to know that the association will come very close to clearing all expenses when everything is settled up. This is largely due to the fact that officials and helpers did all the work gratis.

Proceeds from the carnival and the big dance in the evening helped out considerably in meeting expenses.

The horse races, bucking contests, calf roping and steer riding were all cleanly conducted making every event interesting and exciting.

The following were the winners in the several events—

**Stampede Events**  
Bucking Horses—1st, R. E. Jacobson; 2nd, Holly Hearn; 3rd, Brad Crocker.  
Baeback Riding—1. W. Woodford; 2. C. Franklin; 3. Joe Wells.

Steer Riding—1. Brad Crocker; 2. Ed Quinn; 3. C. Franklin.  
Wild Cow Race—1. Joe Wells; 2. Brad Crocker; 3. R. E. Jacobson.

Calf Roping—1. H. Mitchell; 2. R. Rose; 3. Reg Rose. The winner roped his calf in 27 sec.

**Horse Races**  
Six Furlongs—1. R. Page; 2. Mrs. Joe Tester; 3. Joe Tester.

Trotting Race—1. Joe Tester; 2. J. Walker; 3. Joe Tester.  
At a combined meeting of the W. M. S. and the Ladies Aid of Gordon Memorial Church, held in the School Room last Thursday afternoon, Mrs. Pow, Vice President of the W. M. S. was guest of honor. A very pleasant social time was had, and during the afternoon, Mrs. R. Phillips read a complimentary address to the guest, who was then presented with a Life Membership. W. M. S. Pie by Mrs. J. A. Stratton, and with a Souvenir (upon suitable engraved by Mrs. Wynn.

14th Hands and Under—1. A. Williamson; 2. R. Page; 3. E. Congram.  
Ladies Race—1. R. Page; 2. Mrs. Tester.

Half Mile Race—1. R. Page; 2. Mrs. Tester; 3. A. Williamson.

Novelty Race—1. J. Walker; 2. R. Lehr; 3. J. Schaffer.

Shetland Pony Race—1. M. Leod; 2. Goodine; 3. Bastine.

Boys Under 15—A. Congram; 2. J. Lapp.

Quarter Mile—1. L. Tucker; 2. J. Schaffer.

Five Express—1. R. Page; 2. A. Williamson; 3. J. Tester.

Foot Races  
1st Mile—1. W. 2. J.

## Local Rebekah Lodge Celebrates Birthday

Also Holds Farewell For Miss Doris Salton

Following the second meeting in June of the above lodge a social hour was enjoyed in celebration of the tenth birthday of the lodge.

Lunch was served by the Social Committee. The usual birthday cake was there with its ten candles making the occasion quite festive. Refreshments were made during the evening. One was to Miss Doris Salton, whose help as been greatly appreciated and whose departure is much regretted by the members.

The other presentation was to Sister Emma Cunn who is to leave shortly on trip to England and France.

Both Sisters thanked the members for the lovely gifts and also for their kind thoughts and good wishes.

The next meeting of Vera Lodge will be held on Sept 2nd.

Thacker— Morrison

A quiet wedding took place at the bride's home in Medicine Hat last Wednesday, July 1st when Helen McFarlane married only daughter of Mrs. J. Thacker and the late James Thacker.

The bride was married to Mr. Fernand Thacker, son of Mr. and Mrs. Wm. Thacker of this town.

Rev. M. S. Black officiated assisted by Rev. R. E. Pow. Miss Isobel Anderson and Miss Mary Morrison, cousins of the bride, acted as bridesmaids.

The groom was attended by A. Baldwin and Mr. J. Anderson. After the wedding breakfast, the young couple left by motor for Calgary and points west.

On their return Mr. and Mrs. Thacker will reside in the Hat.

Miss Greenleaf of Calgary was the guest of Mr. and Mrs. F. Congram over the week-end.

Miss Sellhorn has been appointed an Examiner for History papers by the Department of Education, leaves for Edmonton on July 1st.

Rev. and Mrs. Pow and their family were the guests of Mr. and Mrs. A. N. Colford at an enjoyable dinner party on Monday evening. During the evening several other guests arrived and a pleasant time was spent in games and community singing.

C. Mauch; 3. Mrs. A. Dutton; 4. Pat Mens Hesse; 1. Wilfred (Amateur); 2. T. Palmer; 3. D. J. Robinson; M. L. A. Married Women's Race—1. Mrs. Fitzhugh; 2. Mrs. Dutton; 3. Mrs. Benjamin.

Human Wheelbarrow Race—1. Loran Brown; 2. R. Allanach and E. Martin.

Men's Three Legged Race—1. TedStyne and A. Schneider; 2. R. Allanach and W. Huxford.

Ladies Three Legged Race—1. E. Lehr and M. Fairhurst; 2. H. Rose and E. Schillman; 3. Jim English of Medicine Hat won the Shetland pony by drawing the lucky number for the door prize at the carnival.

Miss A. Bindahl won the watch for guessing the number of beans in the jar.

## Public School Promotion Examination Results

Grade I to II

1. Wilma Pickering; 2. Colleen McKay; 3. Marie Van Wert; 4. Jacqueline McCleary; 5. Elaine Sangster; 6. Nick Barnamick; 7. Ronald Fitzhugh; 8. Alice Shinnin; 9. Ralph Willis; 10. Virgil Bastien; 11. Edward Newman; 12. Kathleen McGimpsey; 13. Margaret Moore; 14. Fredrick McCleary; 15. Joyce Balmer; 16. Thomas Tisdale; 17. Herbert Kopp; 18. William Chaeffer; 19. Ellen Tonks; 20. Paul Walters.

Grade II to III

1. Howard O'Beary; 2. Ellen Lightfoot; 3. Lorraine Palmar; 4. Ada Walters; 5. Earl Johnson; 6. Jean Hoogveld; 7. Walter Lee; 8. Margaret Myers; 9. Mary Bortis; 10. Margaret Ann; 11. John Hnatik; 12. J. Schneider; 13. Kay Luna; 14. Leonard Galk; 15. Lavina Fitzhugh; 16. Lucille Gordon; 17. Barbara Trechtritter.

Grade III to IV

1. Ethel King; 2. Bruce Shears; 3. Colleen Jacobson; 4. Florence Cooper; 5. Roy Willis; 6. Ellen Johnson; 7. Mary Ann Hoogveld; 8. Andrew Maden; 9. Dick Harvare; 10. Norma White; 11. Valma Osgood; 12. Evelyn Waters; 13. Marjorie Horne; 14. Bess Tonks; 15. Tommy Balmer; 16. Carl Tysing; 17. John Moore; 18. Peter Balmer; 19. Nicky Balmer; 20. Doreen Fitzhugh; 21. Adelaide Bell; 22. Agnes Gordon; 23. Jackie Hope; 24. Hoyard Osgood.

Grade IV to V

1. Ruth Jorgensen; 2. Gladys Johnson; 3. Billy Martin; 4. Dorothy Lien; 5. Donald Harvare; 6. Florence Campana; 7. John Cooper; 8. Gordon Hurt; 9. Kathleen Cooke; 10. Laurie Maillard; 11. Mary Joris; 12. Billy Johnson; 13. Dorothy Britt; 14. Jimmy Dacre; 15. Dorothy Walton; 16. Joe Balmer; 17. Annie Slavichak; 18. Betty Stratton; 19. George Myers; 20. Martha Schiner; 21. Joe Sikko; 22. Jean Patton; 23. Louise Fitzhugh; 24. Donald Sangster; 25. Leopold Bolando; 26. Howard Waters; 27. Donald Horne. Recommended—Althea Schaeffer.

Grade V to VI

1. Gordon Shearsby; 2. Cecil Saverst; 3. Edna Martin; 4. Billy Blades; 5. Bobby Wyatt; 6. Reiner Jorgensen; 7. Roy Newham; 8. Betty Balmer; 9. Robert Pederson; 10. George Hope; 11. Horace O'Beary; 12. Marjorie Hitchen; 13. Lizzie Wells.

Grade VI to VII

1. Richard Cooper; 2. Cyril Worts; 3. Florence Bailey; 4. Gordon Osgood; 5. Helen O'Beary; 6. Cornelius Hoogveld; 7. Kenneth McKnight; 8. Annie Schaeffer; 9. Mary Snow; 10. Alfred Goodie; 11. Ellen Cook; 12. Ronald Johnson; 13. Louise Shaw; 14. Ellen Horne; 15. Kate Luna; 16. Wilfred Hurt; 17. Marjorie Byrd; 18. Joe Balmer; 19. Helen Perin; 20. Ernest; 21. Edward Martin; 22. David Floyd; 24. Ruth Lien; 25. Irene Pearson; 26. Bessie Shaw.

## Local School Makes Good in P. T. Contest

Win 1. First, 2. Second and 1 Third Prize

Redcliff Cadets have once more brought honor to themselves, their school and their town.

Major Miller's recent inspection of the Town Corps of the province resulted as follows: Army and Navy Child Competition, in which the 16 smartest cadets only took part—1st, Redcliff, 2nd, Red Deer.

Gravelly Shield Competition, for physical training in the whole corp—1st, Red Deer, 2nd, Redcliff.

Bennett Shield Competition, for general efficiency in the entire corp—1st, Camrose Practice School, 2nd, Redcliff.

Tranvewer Shield—Open Competition—1st, Lethbridge, 2nd, Red Deer, 3rd, Redcliff.

In the first three competitions 25 schools took part and in the last Lethbridge also competed making 26 entrants.

Redcliff is proud of its cadets and Mr. Cyrus Pow who has charge of them deserves great credit for the splendid results of his training.

**Lethbridge School Wins Cadet Shield**

Red Deer Comes Second and Redcliff Third

In the School Cadet competition which was recently inspected, Lethbridge won the Tranvewer Shield for highest all round efficiency. Red Deer has placed second and Redcliff third, the score being as follows: Lethbridge 90 per cent, Red Deer 85 per cent and Redcliff 83.

When it is considered that there are 26 corps in the province, most of which are much larger centres than Redcliff the showing made by our school is very creditable.

The Strathcona Trust first aid clinic was also by the bridge, Alberta Military Institute second and Calgary School Cadets third.

School closed Tuesday for the summer holidays and will open again on Sept. 1st. The Board is making arrangements to have the school house cleaned and repainted during the holidays.

Conditioned—Marie Fitzhugh.

Grade VII to VIII

1. Kathleen Shearsby; 2. Flora Stratton; 3. Evelyn Kaldstad; 4. Stanley Lenning; 5. Winnifred Bamforth; 6. David Gordon; 7. Anna Jorgensen; 8. Jack Lien; 9. Evelyn Fulton; 10. Kenneth Newham; 11. Kate Evans; 12. Violet Hope; 13. Eugene Rose; 14. Mable Humphrey; 15. Joanne Balmer.

Grade VIII to IX

1. Harold Moschold; 2. John Walton; 3. Fred Blades; 4. Roy Allanach; 5. Esther Rexin; 6. Mary Lidicky; 7. Kathleen Myers; 8. May Martin; 9. Marjorie Fairhurst; 10. Ruberta Shaw.

## The Swimming Pool Opened Last Sunday

Season Tickets May Now Be Secured at the Pool

There was great rejoicing among the youngsters in town when it was learned that the swimming pool was opened for the summer, and although the weather was considerably cooler for the opening, the pool was well patronized.

Just how long the pool will be kept open depends largely on what support it gets from the citizens of the town. As the committee started off with a small cash balance on hand, it is hoped they will get sufficient co-operation to keep the pool open for at least two months.

Season tickets are now issued and may be secured from Mr. Peterson at the pool, or from members of the executive.

A season ticket entitles all school children in the family or those who are not working, to the use of the pool.

As considerable repairs are necessary to both the pool and the dressing rooms it is requested that tickets be secured as soon as possible.

President Roosevelt has been nominated as candidate for the presidency of U. S. by the Democratic party.

Mail in several sections of Manitoba has caused heavy damage to crops. Garden crops were also wiped out. In one section a strip five miles wide was hauled out 75 per cent.

Sections of North Dakota have not had rain for over a year. Cattle are wandering among the parched crops and along roads foraging for such sparse vegetation as they can find.

Insect pests such as crickets, grasshoppers, caterpillars, crickets, beetles, cutworms and crickets are also adding a new menace through N. Dakota, Wisconsin, Nebraska, Iowa, Illinois and Kansas.

All governments, federal, provincial and municipal, have done and are still doing their utmost to solve the unemployment question and still there is a certain element of the unemployed, backed up by agitators, who are always making trouble and making it more difficult for all to solve these problems.

**Churches**

ST. MARY'S CHURCH

Mass will be celebrated on the 2nd Sunday of each month at 8:30 a. m.

ST. AMBROSE CHURCH

Rev. H. S. Hammett, Vicar

4th Sunday after Trinity—July 5th, 1936.

8 a. m. Holy Communion. 10:30 a. m. Sunday School. 11 a. m. Choral Eucharist. 3:30 p. m. Alderson. 7:30 p. m. Evensong.

Monday June 29, 9 a. m. Holy Communion; S. Peter's Day. Wednesday, July 1st, 9 a. m. Holy Communion Dominion Day.

GORDON MEMORIAL UNITED CHURCH

19 a. m. Church School. 11:15 a. m. Morning Worship. 3 p. m. Service at Board. 7:30 p. m. Evening Worship.

"Worship is to religion, what fragrance is to the flower."

## Local Man to Be Guest of the German Govt.

Mr. King Chosen as One of The Thirty from Canada

Among those from Canada who are taking the trip to Viny Ridge, 30 men are being entertained by the German Government for three weeks.

These thirty are picked from those who have been instructors in physical training in schools or cadet corps and have been selected by the inspectors of the several provinces. Among the thirty, Mr. Walter King, principal of our school, is one.

Upon their arrival on German soil they will be guests of Hitler and will be entertained in Berlin to mass demonstrations of several thousands who will take part in all kinds of P. T. drills.

From Berlin the guests will be taken to Olympic City where the Olympic contests will be conducted.

As Mr. King is an enthusiast in this line of school work his selection as one of those chosen was well made and we congratulate him upon his appointment.

We may look forward to seeing some new ideas demonstrated in this line on his return and at the same time a very pleasant holiday.

**Relief Camps Are Now Demobilized**

Will Endeavor to Find Jobs For Unemployed

Canada's Army of Unemployed who have been in relief camps for over four years, were demobilized yesterday.

Most of these unemployed single men will be transferred to work on the railways. Others are expected to be absorbed in various branches of industry and some have gone to work on farms.

All governments, federal, provincial and municipal, have done and are still doing their utmost to solve the unemployment question and still there is a certain element of the unemployed, backed up by agitators, who are always making trouble and making it more difficult for all to solve these problems.

Canadian Pacific

## AFTER EVERY MEAL

## The Need For Security

With the international situation, not only in Europe but also in the Orient becoming daily more fraught with peril, the necessity for a rejuvenated and strengthened League of Nations becomes apparent, if world peace is to be preserved.

First hint of the likelihood of an eventuality, which must have been obvious for some time to student-observers of international trends came in despatches recently to the daily press of this country when the Italian Mussolini was reported to be paving the way for a rapprochement between Italy, Germany and Austria by attempting to effect a reconciliation of differences between the last two mentioned countries.

When one considers the situation in which these three countries find themselves an alliance in a common cause appears a natural probability. All three sustained serious losses during the Great War and its aftermath. All three are in urgent need of extension of territory to provide an outlet for a large number of unemployed or partially subsaturated population, or as a source of raw materials or for the promotion of trade or for all three. All three are in the same political as well as the same economic boat for they are fascist, dictatorial. The people of all three countries are intensely ambitious to regain what they have lost and this is probably the principal reason why they are content with the form of government they have.

It is true that the Italian aggression in Ethiopia appears, on the face of it, to have resulted in triumphal achievement for the Italian force, but it is doubtful whether, in the long run, acquisition of Abyssinia, even if subsequent events do not result in some such result, will be a benefit to Italy. At the instance of the League, will prove of great economic benefit to Rome. In any event, it can surely be taken for granted that Mussolini and the Italian people, in their present frame of mind, will not be satisfied to call it a day and breathe the word.

With this Italian viewpoint prevailing and Germany and France cycling ever another with distrust and apprehension, an alliance between Germany and Italy, fortified by Austria, could not be calculated to render the European situation more secure. Both Italy and Germany are not only well armed and equipped but are perfecting their war machines to the nth degree of perfection, the training of their troops.

The situation is an exceedingly difficult one for Great Britain whose people do not wish to be dragged into another conflagration. On the contrary the inhabitants of the "little white paper" are bent on their march towards recovery of economic conditions and statistics prove that they are well on the road towards this objective.

While the British government is keenly alive to the dangers of the international situation, fortunately the statesmen are not disposed to be stampeded into any precipitate measures and quite evidently the people of the country are well satisfied with Anthony Eden's recent assurance that in the council of the League of Nations the country is prepared to "play its part."

Expressing satisfaction with this viewpoint the London Times in a recent editorial said:

"If the League, even the incomplete League, had disposed of the will, as it certainly disposed of the means, to bring aggression to a standstill by economic non-cooperation, nothing would have been heard of the contention that the refusal of aid to the aggressor means war; peace would have been successful trial of its resources, and generally we should be looking on a very different picture today."

"Yet, even if the League had succeeded, as it clearly could have succeeded, in the policy of passive resistance, it would still have been necessary to write another chapter in its development and to increase its powers by compelling its non-compliance with the League's decision to correspond with its capacity. The obstacle to be overcome is the 'spirit of mutual distrust' between France and Germany."

"The outlook which is gloomy indeed if it is not, as we are being, or could be, made to attack the situation at its roots, and no responsibility could be more willingly and gladly borne by British statesmanship than that of seeking the means to end an antagonism which survives to the common danger."

"The Times goes on to say that this endeavor was moved into the stage of 'serious practical discussions when the questions addressed to the German government on the subject of Herr Hitler's proposals for a lasting European settlement were published in a British White Paper' and suggests that conversations be pursued in a manner that will permit of 'opportunities for any possible misunderstanding of tone and intention on either side.'"

## Bears Attack Aeroplane

Stopped Off Door While Machine Was Parked Overnight

Unreported for two months, J. C. P. Daidel, "mystery" flying trapper of the north, has been to Fort Simpson, N.W.T., from his remote trapline with his aeroplane parked up where two grizzly bears ripped off the door and damaged, fairly around it.

Daidel, who went out to Edmonton last year, learned to fly and came back with an aeroplane, and the bears went after the machine while it was "parked" overnight in snow. The bears were after a bundle of heavier oils in the craft.

The flyer trapper brought a good catch of fur when he arrived at Fort Simpson, and said his winter trapping operations were successful.

Moscow, Russia, reports that over 100 Soviet radio balloons have been sent in other countries.

## for PIMPLES

Add a small amount of cream, or milk, or water, or oil, or honey, or glycerine, or any other liquid, and mix well. Apply to the face.

Clear up your skin!

## MINARD'S

"KING OF PAIN"

There are 640 firms in London more than 100 years old.

## Russian Armaments

Soviet Government Plans To Expand Huge Arm This Year

When the Japanese war office starts to draw attention to the weight of Russian armaments, there is some reason to suggest that the pot is calling the kettle black. Japan devoted 47 per cent. of her whole budget to armaments last year, to defence, and this year proposes to spend 50 per cent. Even so her military budget, and those of all other countries, pale into insignificance by comparison with Russia's. Marshal Tukachevski, deputy-commissioner of defence, recently announced that in 1930 the Soviet would expend 14,800,000,000 roubles on her military forces. At the official rate of exchange this sum represents £2,000,000,000 sterling. Britain has for months been debating whether she should spend half the latter sum, spread over a period of years, on modernizing her sea, land and air forces. From all this it is clear enough that, whether the Japanese war office wishes to put the nation to the test, or whether the Soviet has substantial material to exploit—Auckland News.

## WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Ready to Go

The liver should get out two pounds of bile every day. If it doesn't, you'll feel tired, sluggish, and your digestion will be poor. You'll also feel a heavy, full, bloated feeling in the stomach, and you'll have a headache. You'll also feel a heavy, full, bloated feeling in the stomach, and you'll have a headache. You'll also feel a heavy, full, bloated feeling in the stomach, and you'll have a headache.

A Serious Problem

Restoration of Confidence in the Country's Wheat Is Needed

Canada's most serious problem in the opinion of Dr. W. W. Swann, head of the department of economics at the University of Saskatchewan, is a restoration of confidence in the country's wheat.

This is particularly so after the "alarmist" publicity given to the problem because of a temporary crop surplus, said Dr. Swann. The surplus, he held, was only temporary although it has aroused wholly unwarranted fear of a world-wide glut of wheat.

"There has never been any world overproduction of wheat nor any glut of wheat in the world," he said in an interview in Montreal.

"There was a temporary condition, of surplus produced by unusual crop surplus, said Dr. Swann. The surplus, he held, was only temporary although it has aroused wholly unwarranted fear of a world-wide glut of wheat."

Adopt New Method

Nicola Valley Leads The World In Fighting Hoppers

The Nicola valley, which is the western British Columbia leads the world in fighting grasshoppers—the dreaded locust menace of ancient days.

According to word received by the provincial department of agriculture, the method used there, of systematically poisoning the egg beds of the grasshoppers, has been approved by a world conference of entomologists at Cairo, Egypt, as being the most effective. Nicola is the only place where this has been done over a period of years.

Women Police Make Good

Number Attached To Scotland Yard Will Be Increased

The few women who have been attached to the criminal investigation department of Scotland Yard have justified their appointment so well that their number is soon to be considerably increased.

At present there are three women detectives in the west end divisions of the Metropolitan police force, and it is suggested there should be at least one woman detective in each division.

Originated With Latin Poet

The expression "Home was not built in a day" is believed to have originated with the poet Claudius Claudianus, one of the last of the Latin poets (about 400 A.D.). Claudianus wrote "The Roman people slowly built, an unwarmed trailer instantly overthrown." The proverb gradually became modified until it survives in its present form.

Pera reports that business there has been improving since early 1933.

## Worth Fabulous Sum

Chicago Jeweller Not Discarding Priced Paid For Gemmed Crown

In a gilded hotel suite in New York, Warren Piper, a Chicago jeweller, displayed a great glittering diadem which he described as the storied and all-but-priceless crown of Our Lady of the Andes.

A group of visitors stood peeped before the magnificence of the crown, which Piper, head of the American syndicate which had just come into possession of the object, had placed in a dull wooden case, hooded by indirect lights.

The poet of the diadem gleamed fully against the green radiance shooting from the stones, which Piper said were emeralds, emeralds and jetting pendant from the crown.

Piper declined specifically to estimate its value, saying the emerald it contained were all but priceless, but he mentioned \$4,000,000 as an approximate figure.

While faced with apparent excitement, he said he could give no exact information as to just what will be done with the crown, which has, however, it might first be placed on exhibition and later broken up for sale to the public.

Here is substantially the story of the diadem as related by Piper: It was completed in 1890 and then sent, like those by Princess Conquistadora in the conquest of Peru four centuries ago. Negotiations for its sale to the diadem described as the most valuable ever owned by the Catholic Church, began in 1914, proceeds to go to Piper and his associates more than a year ago began active negotiations. Meanwhile the crown had been under safekeeping in New York.

Piper would not disclose the price paid. He said merely that money went to several South American countries, claiming a part ownership, as well as to the church.

## Has Peculiar Style

England's Walking Champion May Be Barred From Olympics

A man with an Olympic victory in V. W. G. Stone, England's walking champion—and for good reason. Stone is a blue streak on the cinders, so much faster than his British rivals that they scarcely can keep him in sight, yet the Olympic officials have notified him he won't be among those present at Berlin this summer when he alters his walking style.

"And why not?" asks Stone, justifiably, having just won the British seven-mile championship. "Because," comes the rejoinder, "we're not sure that you're really walking. Maybe you're running."

And that's how matters stand. A potential Olympic champion (they claim his time is well under the Olympic record) might have to stay at home because his country's officials don't wish to take any chances.

Moving pictures, it is pointed out by Stone's supporters, reveal nothing amiss with his walking. He retains a normal, easy stride, and the ground, which is the vital difference between walking and running. Yet he has such a peculiar, unorthodox gait, and so much swifter than any rival hitherto, that officials simply won't believe it.

## Not Home For Candles

John Birch of North Bay, Ontario, celebrated a birthday June 3, but in the case wouldn't hold candles enough to mark the occasion. Claimed to be the oldest white man in Canada, Mr. Birch entered his 114th year of life.

The brain is not mentioned in the Bible. Only in modern times has the organ's function been known. Aristotle, learned Greek, believed its purpose was to cool the blood.

## Depends On The Country

Whether Ship Shipments Have To Be Heavily Guarded

A traveler recently returned from foreign parts tells me a story about gold. It seems that the ship on which this traveler returned carried a large 'cannister' of gold at Havre. The stuff was loaded much more with the crew, and was lowered into a special hold. And what struck my informant about the operation was the fact that while the loading was in progress not a single uniformed member of the French law was in sight on the dock or on the ship.

There were numerous representatives of the banks making the shipment and numerous French law-shoremen in blue blouses gesticulating and calling to each other in the high-pitched nasal tones which foreigners who try to learn French are never able to reproduce. The banks' agents simply checked the gold about and the ship's officers checked with them. Then the hatches were closed, and that was that.

When the ship got to New York passengers were astonished to see what looked like a whole platoon of police run on the gangplank the moment the ship docked.

The voyager from whom I had the story says he thought perhaps the gold about and the ship's officers checked with them. Then the hatches were closed, and that was that.

## SELECTED RECIPES

CANADA CAKE

1 cup white sugar  
2 eggs  
1/2 cup milk  
1/2 cup butter  
1/2 cup lard  
1/2 cup sugar  
1/2 cup milk  
1/2 cup butter  
1/2 cup lard

Method—1. Cream butter, 2. Add sugar gradually, 3. Beat in unbeaten eggs, 4. Add milk and vanilla, 5. Mix flour with baking powder and salt and add to mixture No. 4, 6. Bake in layer or loaf cake tins in moderate oven of 375 degrees for 20 minutes.

## Made Hospital Governor

Honor Conferred On Seven-Year-Old Boy In England

George Thornton, aged seven, of Nottingham, is the youngest hospital governor in England. He has just been elected a life governor of the Royal Eye Hospital, Southwark. The honor was conferred on him because of his success as a collector for the hospital. George was a patient at the hospital two years ago.

## Only Too Clear

A motorist was giving a woman lesson in driving. "The hand lever," he said, "brakes the rear wheels only, and the foot pedal breaks all four. Is that clear?" "Myes," replied the woman, doubtfully, "but I'd rather not have any of them broken."

## Pasteurization Of Milk

Does Not Destroy Vitamins Or Make Milk More Difficult To Digest

Urging compulsory pasteurization throughout Canada, and stressing the great value of milk as a food, Dr. Gordon Bates, general director of the Health League of Canada, declares that pasteurization destroys vitamins to any serious extent, or makes milk more difficult to digest.

"Groups and individuals, selfishly opposed to pasteurization, have expressed opinions that pasteurization changes the taste of milk, that it injures its food value, that it destroys its usefulness by damaging its vitamins, that it injures its digestibility—all of them are absolutely false," Dr. Bates declares.

"Here are some facts: It has been stated that vitamins C and D, the vitamins which prevent scurvy and rickets, are injured by pasteurization. As a matter of fact, vitamin C is somewhat increased by pasteurization. But both vitamins C and D exist in variable and unreliable quantities in milk. There is not sufficient of either to justify any argument in neglecting to add orange juice or tomato juice and cod liver oil to the diet of children, in addition to milk, whether the milk is pasteurized or not. These other foods supply the otherwise deficient vitamins C and D.

"It has been said," Dr. Bates continues, "that the calcium content of milk is reduced by pasteurization. Actually pasteurization, if done, does not damage the mineral composition of milk, although, under some circumstances, there may be a slight precipitation. In any case, there is three times the amount of calcium in cow's milk, that in mother's milk because nature primarily intends cow's milk for calves and calves need more calcium than children.

"It has been suggested that pasteurized milk is not as digestible as raw milk. The experience in the Hospital for Sick Children in Toronto is exactly the reverse," says Dr. Bates.

"Dr. Alan Brown, physician-in-chief at the Hospital for Sick Children, said in a recent statement prepared for the Ontario government that, during the past 20 years, every drop of milk given in-patients and out-patients, in that hospital had been, not only pasteurized, but, in addition, boiled to improve its digestibility still further. Dr. Brown, at the same time, definitely contradicted the statement that pasteurization changes the natural condition of the milk," says Dr. Bates.

## Buildings Are Imposing

Musical Forum In Rome Accommodates Thousands Of Spectators

The Musical Forum is one of the most interesting and imposing set of buildings erected by the Fascists in Rome. The Academy of Physical Education, the Stadium of Marcellus, the Stadium of Cyprius, and the travertine amphitheatre will be able to accommodate 60,000 spectators.

The Palace of the Swimming Pool covers an area of 100 square metres, and includes, besides the group of covered swimming pools, the premises for radium, thermal and sun bathing. A large gymnasium, lounges, shower bath and rooms for the social hour are annexed to the pool. Installations on a large scale are provided to guarantee the fertilization of the water, which is heated to a pleasant warmth. A sodium lamp for sun bathing covers an area of about 4,000 square metres.

## Lighted Two Centuries Ago

Votive Fire Tended By Nuns In Quebec Convent

A light that has burned for more than 200 years is tended by the nuns in the Ursuline Convent at Quebec.

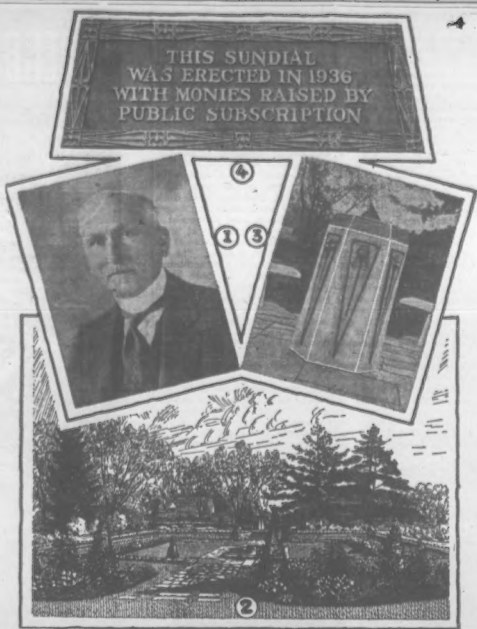

The flame was originally lighted and tended by Marie Madeleine de Repentigny, member of a proud and ancient French family, when she entered the order of Ursulines following the death of her fiance, a young French officer.

Although a part of the convent was burned in 1759 when the British General, James Wolfe, besieged Quebec, ten nuns remained in the ruins to protect the votive fire.

## The First Parliament

Seventy years ago June 8 the first parliament met at Ottawa. It was the parliament of the province of Canada, formed by the union of Ontario and Quebec, and marked the end of a period of retarded parliamentary which had been held in Toronto and Quebec.

During its lifetime, the average session 29 days 20 hours of business.

The Macdon Memorial Garden was opened at the Central Experimental Farm on June 6th by Rt. Hon. W. L. Macdonald, Prime Minister of Canada. The above pictures show: 1. The late Dr. W. T. Macdonald, Dominion Horticulturist from 1910 to 1933, in whose memory the memorial garden has been constructed; 2. View of the Memorial Garden looking east, showing the lily pool and sundial; 3. Close-up of sundial; 4. Detail photograph of one of the six bronze inscription plates.

## No Romance In Crime

Stigma Of All That Is Wrong Should Be Placed On It

J. Edgar Hoover, of the U.S. Department of Justice, in his address to Maryland Students, said: "You people here in these halls of education read of crime conditions as told in the newspapers, but that is to get half the story. I'm going to do everything possible to debunk the fallacious idea of romance in crime.

In gangs, criminals do the most human and brutal things with a defiant and total disregard for the lives of others. They think nothing of murdering right and left when they have their machine guns, their bullet-proof vests, their armored cars and smoke screens.

But there is another side to the story. How do they act when they are caught. Whimpering cowards they are. Cynic is sniveling, filthy and dirty. You young men have a duty to perform to your country in time of peace. The stigma of all that is wrong should be placed on crime, and you should do it in a most positive manner."

## Streamlined Locomotive

New C.N.R. Engine Capable Of Reaching Speed Of 100 Miles An Hour

"No. 6400," the largest streamlined steam locomotive in the world and Canada's first locomotive of this design, has been tested in Montreal, the management of the Canadian National Railways announced.

Builders estimate the new locomotive is capable of reaching a speed of 100 miles an hour. It will be used in fast passenger train service between Montreal, Toronto and Barrie. On four other streamlined steam locomotives which have been in the process of completion are now in progress.

The new engine, more than 94 feet long, follows a plan developed by the national research council at Ottawa. Smokestack, bell, cowcatcher and coupler are all concealed by the streamlining.

## Just Getting Ready

The teacher had forbidden the children to eat candy or chew gum during school time. One day she became suspicious of a lump in Jimmie's cheek.

"Jimmie," she said reprovingly, "are you eating candy or chewing gum?"

"Neither one," replied Jimmie. "I'm sucking a prune to eat to rest."

## Are We Changing

Are People Laughing In Character Of Those Trained In A Sterner Age?

"Is England—are we—changing? And if so, in what direction? Are we nicer or nastier than our fathers and mothers, our grandfathers and our grandmothers? Are we better mannered, more cultured, more capable; or are we more spoiled, more pretentious, less energetic, less honest among ourselves? Are we growing up, and easier to live with? Or are we as a nation, on the slope of an infantile regression, lacking the character of those trained in a sterner age?"—The Economist.

The total milk production in Canada in 1935 is provisionally estimated at 10,310,535,700 pounds which is approximately the same as in 1934.

British railways carried more than 12,000,000 pigeons during the pigeon-racing season of 1935.

## Salvage In Quetta Finished

Wreckage Caused By Last Year's Earthquake Finally Removed

Clearing of the wreckage in Quetta, epicentre of the disastrous earthquake in India last June, when 50,000 lives were lost, has been completed. Salvage crews restored 32,667 houses and stores, and expended 8,078 bullocks. Property worth \$2,337,000 was recovered and returned to the owners. The real value of this property is at least double the figure given, the report adds, because it was not thought proper to harass the owners unnecessarily in time of distress in order to obtain the exact estimates.

## Beef Of White Outland

A herd of five white caribou, a species hitherto unknown at Nipelon, British Columbia, was encountered by Max Everett, chief game warden, during a trip into the hills. Pictures of the animals were obtained.

## YOUTHFUL PIANIST BECOMES MODEL ENTERTAINIST

Wilfred Warden, youthful British pianist, turned down an offer to broadcast on an Empire Programme on June 20th, because he may win a berth on the British team of model aeroplanes makers, which will travel to the United States this month to compete with an American team for the Lord Walsley trophy. At the present time 123 model aeroplane enthusiasts are competing at the Great West Aerodrome, Harmondsworth, for the right to take the models to the United States for international competition. The youthful pianist is shown above with his model plane.

## Causes Of Most Accidents

Experts Find Inattention Of Driver Heads The List

The factor most often responsible for automobile accidents is inattention, and the type of driver most dangerous in traffic is the driver, according to the majority finding of the country's leading psychologists.

In the list of factors named by more than 150 experts in psychology, inattention received more votes than any other, and was followed by lack of judgment, recklessness, thoughtlessness, love of speed, slow wits and excitement. The drinking type of driver was closely pressed for first place by the immature, the nervous, the mentally slow and the ruthless. It is evident, however, that these rather loose designations may be grouped. Inattention and thoughtlessness are two brothers; recklessness, love of speed and excitement are certainly members of the same family, and slow-wittedness, or tardiness to react, is characteristic of even the moderate driver, although it is found also in persons who do not use liquor.

The factor of inattention, more often named than any other, merits the emphasis given it by the psychologists. The conversative driver, the eye-wandering driver, the peevish driver who lights his cigarette with one hand on the wheel and one on the coffin nail, the motorist, baseball fan who tries to follow a broadcast of the afternoon's game while steering his car, are dangerous persons. Thirty seconds of divided attention is enough to cause an accident. None of the things that tempt the mind and the eye away from the job in worth the risk. Concentrate on the road is a first rule of safe driving. Chicago Daily News.

## Not Great Fish Eaters

Canadians Are Almost Smallest Consumers In World

In its seafood and inland waters Canada possesses the world's largest and richest fishing grounds. Despite this Canadian as a people are not the smallest consumers of fish and the value of the industry has decreased more than \$15,000,000 in the past decade.

The Government proposes to try and remedy the situation by endeavoring through publicity and education to increase both foreign demand and home consumption. That the situation is already improving is indicated by the fact that there was an increase in export business in 1935 over 1934 of more than \$2,351,000.

Greater home consumption is a simpler problem and depends in great measure on the extent to which Canadians will help themselves by eating more fish. Annual per capita consumption in Great Britain is 21 pounds. In Canada it is 21 pounds. But the consumption could easily be doubled with resultant advantage to health, economy and prosperity.

There are many things to be said in favor of an increased diet of fish. It is cheap, particularly nutritious, easily digested, delicious in taste if properly cooked, and contains valuable health-giving elements. Iodine, calcium, phosphorus are some of these white fish oils are the great source of Vitamin D, a basic necessity in building and improving the health of children and invalids. The greatest medical authorities are unanimous in urging the increased use of fish for a healthy and well-balanced diet.—Ottawa Journal.

## Old Custom Banned

Women with bound feet in Shanghai province will not be eligible for marriage after the end of this year. As a means of effectively eradicating this heritage of empire days, the provincial government forbade men under a threat of severe punishment to marry women with cramped feet after January 1, 1937.

## Feathered Foresters

When an ocean storm is brewing, sea gulls hang close to the shore or over it—and sometimes even fly inland. It's because the fish on which they feed keep deeper at the prospect of the stormy winds that will blow them down the gulls seek their usual somewhere else.

## Have Glass Sold

A small wine glass known as the "Ames" glass was sold at Christie's auction room in London for 200 guineas (\$1,310). The glass, a survivor of the emperor's art, had four verses of the Jacobite Anthem on it.

Old Maid—"I'd like to get married. Do you think any fellow would be my husband?"  
Young Man—"Don't ask me!"

## Man's Fear Of Man

World's Largest Bomproof Shelters Just Completed At Paris

What is believed to be the largest and the most gasproof, bombproof shelter in the world has been completed at Paris and is ready to be a refuge to 8,000 persons. It is the first of a series planned in those sections of the subway which tend themselves to conversion into shelters. This is one reflection of the war fear that weighs upon European nations.

But with the Rhineland remilitarization, Paris is only one hour removed from enemy gas attack. Subway shelters are obviously protection for only a minute fraction of its population. What then? Cellars, catacombs, standardized gas masks, anti-air service. Still with all provision so far conceived as possible, protection to civilian population remains so inadequate that plans for facilitating quick evacuation are being considered. Certain rebuilding projects for Paris, recently announced, are being designed to alter traffic jams on highways converging to the capital, have been undertaken with the advice of military officials with an eye to their use for evacuation.

A move toward decentralization of essential industries, particularly those with direct strategic value, was begun long ago, but except for actual munition factories, little progress has been made.

We repeat these reported facts because they emphasize once more how little the world of today has changed from the lessons of the past and how man's fear of man remains the greatest obstacle in the path of progress. —Buffalo Courier-Express.

## Realized Her Ambition

Mother Of Two Boys Receives Her Master's Degree

"I did it for my boys," said Mrs. P. M. Hartlage, of Edmonton, a mother of two sons who received her master's degree from the University of Alberta yesterday.

Despite the fact she had two fast-growing sons to mother, Mrs. Hartlage surmounted all the difficulties, hardships and work necessary to qualify for the coveted degree.

Seven years ago the young mother came to Canada from Germany when her two sons, Helms and Jürgen, were barely one year old. Her mother was nearing school age and her mother was worried they might not have time to finish the education of native-born Canadian children.

So she enrolled as an art student at the university.

"I did it for my boys," Mrs. Hartlage said. "I studied during the time they were at school and managed to get a master's degree."

It was awarded a bachelor of arts degree in art and a master's in the next fall for a master's degree.

## New Danish Discovery

Toronto Doctor Believes Protoplasm Of Great Value To Medicine

Protoplasm, a new substance recently discovered in Denmark and introduced to Canada by the Connaught laboratories, will be of great value to the medical profession in the opinion of Dr. J. G. Fitzgerald, of Toronto, a director of the Connaught laboratories and an investigator in preventive medicine.

Protoplasm is added to insulin which causes the insulin to act more slowly and greatly increases its beneficial effect.

Dr. Fitzgerald has gone to Vancouver and will set up a Connaught laboratory branch there. He will travel to Europe this fall and visit various universities and hospitals with his work in preventive medicine.

## A Problem For Experts

Marking Of Motor Plugs Seriously Interferes With Television

Those installing television in England have met a new problem. They have found that as television reception is by very short wave length and sparking of plugs in motor cars is caught up by them, there is a possibility of ruining reception by marking the screen with a number of tiny dots. It has been reported in London that each impulse from a spark plug can be picked up within a radius of 90 feet, a serious interference with sets fixed on the outer limits of reception. Experts believe this can be overcome but that it will take time to do so.

Proprietor: "Didn't the waiter give you a menu, sir?"  
Neglected Father: "Certainly; but I ate that an hour ago."

### WORLD HAPPENINGS BRIEFLY TOLD

The skull of the Marquis de Montebello, governor of French Canada at the time of the British conquest, will be placed on exhibition in a Quebec museum.

The king has given his patronage to the British council, set up to promote closer cultural relations between the United Kingdom and foreign countries.

It was authoritatively stated Australia will accept the plan of the British government for a bi-weekly flying-boat service between Singapore and Port Darwin. It is planned to begin service August, 1937.

Unemployed in the United Kingdom declined by 126,188 in the period from April 27 to May 25, it was announced. Insured contributors of the latter date totalled 10,831,000, an increase of 120,000 over the month.

Frank Bernard and Fred Buchanan of Edmonton, both blind, have made a model of the liner Queen Mary. On a scale of one inch to 20 feet, the model is 41 inches long and complete in every detail.

Negotiations are afoot looking to a faster and better steamship service between Canada and Australia and New Zealand, Hon. W. D. Bower, minister of trade and commerce, told the House of Commons yesterday.

J. R. Burbridge, junior city clerk in Halifax, earned \$920 last year and won a \$400 increase. This put him over the \$1,000-a-year class, which he was subject to a 10 per cent. cut. Now he draws \$960 a year.

Fans for a fight across the South Atlantic in a free balloon were being made by Dr. Zimmer, famous Hamburg pilot. The \$700 miles between Casablanca, Morocco, and the mouth of the Amazon river can be covered in from five to eight days with prevailing winds, the balloonist said.

Manitoba is free from grasshoppers this year, for the first time in five years. H. E. Wood, the provincial department of agriculture stated recently. He said that \$200,000 voted by the legislature for a pest-control campaign will not be needed.

### Preserving B.C. Landmark

Directional Finder Will Be Carefully Guarded In Future

A block of stone engraved with lead letters, left at Vancouver, B.C., in 1886 by the crew of H.M.S. Egretta to determine longitude and latitude, has been uncovered near the sunset gun in Stanley Park.

The stone, buried under moss and gravel, was formerly used to correct errors in ship's instruments but fell into disuse and was completely forgotten.

Inscribed on the stone is the exact longitude and latitude of its position with a note it was placed there by the Egretta, historic British survey ship.

The mark is badly worn by feet of careless visitors who were unaware a historic relic lay hidden beneath them. Steps are being taken to preserve the landmark. A protective barrier of chain and concrete will be erected around it so it will be raised on a stone pedestal surrounded by a small garden plot.

### Marine Broadcasting Station

Latest Radio Equipment Integral Part of Helport Lines

According to the London Times, a new liner is now being built at Belfast which will have as an integral part of its equipment a complete broadcasting station. It will have not only an adequately powered transmitter of latest, most up-to-date design but specially constructed broadcasting stations and a special personnel for the purpose of planning and producing programs for the benefit of listeners abroad. The name of the ship is the Kaituma.

When completed, it will sail from Belfast to its home port at Melbourne, Australia, where it will be put into active service between Adelaide, South Australia, and Cairns, North Queensland. The Kaituma will be the first marine broadcasting station to be licensed by a government to transmit entertainment on regular schedules for listeners on land.

### Many Memorial Plans

Late King George Will Be Immortalized All Over Empire

The late King George V. will be remembered through the ages. There have been 200 suggestions for memorials, aside from statues.

Among the leading suggestions for a "philanthropic" national memorial to the late king are:

Acquisition of land for a national park.

Homes for old people throughout the nation.

A medical research fund to include the provision of radium for cancer.

Hotels for young men and women seeking employment far from their homes.

(The money for the philanthropic memorial will be raised through public subscription.)

In addition, many towns and cities throughout Great Britain are selecting memorials.

It is proposed to have a stained glass window in Liverpool cathedral and a solid granite statue in Aberdeen.

A tablet will mark the spot where King George lay in state in Westminster Hall.

A plaque to be placed on the cottage in Wandsworth visited by the King on one of his jubilee tours.

There will be a great statue of King George on a site in London near Parliament Square.

And throughout the empire there will be innumerable statues and memorials to the dead monarch.

In New Delhi, India, there will be a statue approved by the King himself during his lifetime, placed in the centre of Victoria Square.

Charles Jagger, sculptor, died before he finished the carving of the figure, but it will be completed.

The Princes of India are providing this memorial as their contribution to the new winter capital of India where the foundation stone was laid by King George at the conclusion of his Coronation Durbar in 1911.

And in Bombay there will be a memorial infirmary for incurables.

### Britain Has Hard Problem

Diplomacy Will Be Needed To Settle Trouble In Palestine

The trouble the British Government has run into in Palestine arises in considerable part because its wartime programme made too many promises.

It gave pledges to the Jews, and it gave pledges to the Arabs. In practice, if not in theory, those pledges clash.

The result has been a condition of chronic unrest throughout the Holy Land which is getting no less as the years pass, and at the moment is taking the form of something much resembling incipient war.

The British are notable for their ability to smooth away troubles within their Empire and in their spheres of influence, but if they can settle this one satisfactorily, in a way that will produce harmony instead of continuing strife, they may justifiably set up as successors to Solomon the Wise.—Detroit Free Press.

While trying to swing the neck of a chicken, a man in Talnes, New Zealand, let his finger slip, and the sudden jerk broke his arm.

### A Silken Thread

The Tie That Binds Together The Connected Parts Of The British Empire

The recent proposal of a prominent American citizen that the interests of Canada and the United States would best be served were the two countries to join hands politically to form one great, powerful, and resourceful country, appears to be meeting with little or no response on this side of the long, unguarded international boundary, and this fact will probably surprise many good Americans who consider themselves as our cousins in a broad sense.

Naturally there is a reason for Canadian being content to remain within the British Commonwealth of Nations, a reason one could hardly expect Americans to appreciate. The reason is the tie that binds the Dominion of Canada to Great Britain is not an iron chain but a silken thread.

At the outset of the development of Canada this country was governed by Great Britain, but as the country developed self-government, until finally, under the statute of Westminster, Canada gained full nationhood as a member of the British Commonwealth.

The bond is the tie that binds the Dominion of Canada to Great Britain is not an iron chain but a silken thread. At the outset of the development of Canada this country was governed by Great Britain, but as the country developed self-government, until finally, under the statute of Westminster, Canada gained full nationhood as a member of the British Commonwealth.

### Great Progress Made

Montreal Doctor Hopes Eventually To Stamp Out Scarlet Fever

Scarlet fever, number one infectious disease, on the doctor's list, since diphtheria has been conquered, is now generally considered to be no more dangerous than chicken pox or measles, according to Dr. H. B. Cushing, Montreal, who presented a paper on the disease before the recent annual convention of the Ontario Medical Association.

Dr. Cushing warned that while scarlet fever is practically under control, the mortality rate down to one per cent, there is still danger of epidemic of great seriousness.

"If there were no scarlet fever many infectious hospitals would be closed," said Dr. Cushing. The development of tests and anti-toxins used in diphtheria cases, he said.

Dr. Cushing was of the opinion the use of serum for scarlet fever is justified and was optimistic the disease would eventually be stamped out.

"Scarlet fever is practically certain to return in a very virulent form," said Dr. Cushing, "but it is comforting to know we can control the disease with serum."

### MARCH OF PROGRESS

Year by year improvements succeed one another, on the prairies. The once perilous way to the home and back to the horse and buggy gave way to the automobile, until now aeroplanes are gradually taking over many of the duties of the automobile. The latest step in the line of progress is the coming of a powerful, high speed aeroplane, amphibious to begin to serve Saskatchewan, whose sponsors believe will save a great many lives. Preparations for the institution of this new service have been under way for a great many months. In the use of this aeroplane, the patient at a country point is placed on a stretcher, wrapped in blankets and is kept free from the danger of chills until admission to hospital.

### This Lacy Knit Makes Needles Fly

### PATTERN 5335

"Clickety-clack" go the jiff-knit needles, intent on finishing this lacy blouse in two days time. Composed of but two identical pieces, needing only side seams joined, you'll find both lacy and contrasting plain knit stripes work up quickly. Make this, and the skirt of this pattern. In pattern book you'll find complete instructions for making the blouse and skirt. It's all in one, an illustration of them and all of the stitches needed; material requirements.

To obtain this pattern and 20 others in stamps or coin (not preferred) Household Arts Dept., Winning Newspaper, U.S. 121 McLeod Ave., E., Winnipeg.

There is no Alice Brooks pattern book published

### TO REMALL THE PAST

Just before she started on her long journey to Vancouver to function in the Golden Jubilee ceremonies, Canadian Pacific locomotive No. 274, reconstructed in Weston shops, Winnipeg, was photographed with her modern counterpart, the steel encased 2711. Both under steam, both were produced in 1936. The 2711 is an exact replica of the old engine which hauled the first transcontinental train into Port Moody, B.C., then the terminus of the Canadian Pacific Railway.

With passenger re-machining the exact same one of fifty years ago, the exact terminus will have the arrival of the old train's duplicate at 12 noon on Friday, July 3. Premier Pattullo and the mayors of Vancouver, Victoria and Port Moody will give addresses on a Canadian Pacific special representing Harry A. Abbott, who performed the original honors, will reply. At the throat of the locomotive will be W. H. (Bully) Evans, of Vancouver, back to his place after fifty years. P. A. Marshall, of Kamloops, will take up again his duties as conductor. He is the only other surviving member of the train crew of 1886.

Handled and Packaged by KELLY, DOUGLAS & CO. LTD. Vancouver, Canada

### Many Years At Sea

Sir Edgar Britton Started His Career In Sailing Ship

Sir Edgar Britton, tooling the Queen Mary out on the high seas, first went to sea in sailing ships 44 years ago. In his youth he jetted his middle name, Theophilus, and it seems a pity, for he resembles the Roman Emperor and it was an apt name. Theophilus was an iconoclast and humorist, and so is Sir Edgar.

He has ridden pretty nearly everything the Cunard line ever set afloat, and was commodore of the Cunard fleet and captain of the Berengaria, among many others. He was knighted in February, 1934, the third of the Cunard staff to be selected for this honor. The others were the late Sir James Charles and Sir Arthur Hooton. The only White Star commodore who has been knighted is Sir Bertram Hayes.

Last fall, due to the consolidation of the Cunard and White Star lines, there was much uncertainty as to the command of the Queen Mary, with matters of seniority involved. Sir Edgar, ready to retire at 60, was persuaded to sign on for three years more.

"You must be a proud man," says the King to the captain. "I am, sir," says the captain to the King. He left grammar school to become a sailor on the Barque Jessie O'Brien. He joined the Cunard service in 1901. In 1903, he was given a commission in the Royal Reserve. Multitudes of sea-going folk know him and esteem him highly. He has not only a trim ship and trim person, but a trim vocabulary. He is a great spinner of yarns and given to salty and witty discourse.

If small greases occur on silk materials, as quickly as possible, cover with talcum powder and let stand two days, then brush off with clean stiff brush. Very simple and yet effective.

With reference to that watch on the Rhine, sooner or later someone's going to get the works.

The hostess, a remarkable bird feeding in tropical America, has a pair of claws on its wings.

### On Way To Arctic

British Geologists Will Explore Mineral Possibilities Of Baffin's Land

On his way to Churchill, then to Southampton Island, and the west coast of Baffin land, where he and four companions will spend the next three years, P. D. Baird, young geologist and graduate of Cambridge University, left Winnipeg recently.

Mr. Baird will be no newcomer to Canada's Arctic wastes, for in 1934 he spent some months on the coast of Baffin land as a geologist. The expedition is travelling under the auspices of the Royal Geographical Society.

While prospectors have gone as far north as Chesterfield, none has yet explored the mineral possibilities of Baffin land's west coast. Mr. Baird believed.

Among minor comforts which the young men are taking with them will be 12 pounds of tobacco, which they have brought all the way from England, and which is packed in airtight cans, and a radio receiving set.

### New Type Of Engine

Turbomotive Drawing Famous Royal Scot Uses Super-Heated Steam

A noteworthy innovation in British railway practice took place when The Royal Scot's famous E. 4, M. & S. train from Dunston, London, to Glasgow Central was drawn by the turbomotive, a new type of engine which has been completed by the Company at their Crewe works.

Developing some 2,600 horsepower with a tender capacity of nine tons of coal and 4,000 gallons of water, the engine uses super-heated steam at a pressure of 220 pounds per square inch.

The turbomotive presents an unusual feature in the almost complete absence of the visible mechanism that characterizes the ordinary express engine. The only visible parts are the coupling rods of the driving wheels.

Barometer Of Temperament Too is a barometer of your temperament. If they have a bluish nose, you're temperamental; a bluish nose is to be neurotic. Yellow teeth indicate a jolly disposition. And nearly white teeth—the kind you see years ago—are a sign of poor molars. . . . And speaking of teeth: America's sweet tooth has caused the per capita consumption of sugar in this country to nearly double since 1900.

Record Parachute Jumps More than 800,000 parachute jumps were made from special parachute-jumping towers in Russia last year, according to figures just issued in Moscow. Russia claims it is the first to have made the new record in parachute-jumping, holding all the records.

The National Greyhound Racing Club of England has more than 45,000 dogs and 25,000 owners on its registers.

**20% Off For Cash**  
This is a Summer Sale of Men's Clothing, Furnishings and Shoes, at a Saving of 20 per cent.  
Off the Marked Price, For Cash.  
One of the many reasons why this SALE figures so prominently with men who are smart dressers, is because it has built up through the years of successful experience in the art of selling Good Merchandise. What we are trying to point out, is that we are not only seeking to give the Highest in Quality at the very substantial saving of 20% Off, but also the Newest in Style; a concrete example why men look forward to this Unusual Event. A Few Nationally advertised lines excepted.

## FIRST... THE TRUTH

THE same man is a hero to his friend and a rascal to his enemy. Opinions differ. Opinions will always differ. But an intelligent opinion is possible only when all the facts are known. The truth—the facts—the news—these are the essentials. You must have them to think clearly, to decide intelligently on any question. And you need not be without them. News of every event of importance, every issue, every angle, is brought to you by the press—not just one version, but the whole truth as it can be drawn from every available source.

A GOOD newspaper's own expressions of opinion are confined to its editorial space. The integrity of its news columns is inviolate. They present the discoverable facts, uncolored by politics or allegiance to any group or faction. Your inalienable right to form your own opinion is unprejudiced.

A FREE and untrammelled press—a liberty that is denied in many other countries—that is what the independent daily and weekly newspapers of Alberta offer you. They give a voice to current opinion that is heard in high places. They are a perpetual safeguard to the freedom and welfare of the people.

YOU OWE IT TO YOURSELF TO SUPPORT THE NEWSPAPERS THAT SPEAK IN YOUR INTEREST
